## **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 1. Claims 1-22 are rejected under 35 U.S.C 102(b) as being anticipated by Mazess et al (US 6,438,201).

As to claim 1, Mazess et al. teaches a method for detecting scintillator hysteresis artifacts in an image from an x-ray detector, said method including: examining an image from an x-ray detector to measure a first signal level for a first area of interest and a second signal level for a second area of interest (column 20, lines 1-33, note that once the scan is complete, the signals provided by the detector 13 are reconstructed in image on the computer), wherein said first area of interest includes a first image area (bone area values of process 80) and said second area includes a second image area (bone area values of process block 82); determining a difference in said first signal level and said second signal level (column 28, lines 32-56, note that the detector 13 is sampled and digitized so as to produce a signal consisting of DAS which transmit the digital signal to the computer 18 as an image); and comparing said difference to a threshold to detect a scintillator hysteresis shape artifact (figure 12 and 14, the threshold for the distinction between the bone and soft tissues is determined by means, of a graph and note that computer 18 compares

Art Unit: 2624

the flux index to the minimum and maximum flux threshold, column 34, lines 45-59, column 28, lines 57-60).

2. Rejections for claims 2-22 are set forth and rejected as per claim 1 above and the previous non-final office action (mailed on 3/22/2007), which is incorporated herein by reference.

## Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nancy Bitar whose telephone number is (571) 270-1041. The examiner can normally be reached on M-F 8:30am-5:00pm.

Art Unit: 2624

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Samir Ahmed can be reached on (571) 272-7413. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
